ExaPanel Architectural Facades

ExaPanel is a prefinished fibre cement panel that is based off the James Hardie compressed fibre cement. This sheet is sanded, calibrated, primed and prefinished with a Factory Coated – two pack Fluoropolymer Paint System.

ExaPanel can come in any solid colour and a large range of metallics.

Other finishes including Custom Graphic Panels & Timber Grain Prints.

ExaPanel has inherent anti graffiti properties, a low maintenance requirement and can be used for External or Internal walls or soffit panelling solutions

ExaPanel comes either cut to size or at full sheet sizes for cutting on site.

This warranty is subject to an approved installation system. Panels are to be installed in strict accordance to the manufacturer's instructions. The warranty will not apply if a defect is caused by failure to install the product in accordance with the James Hardie "Exotec" Façade panel and fixing system installation manual as per the link below:

Applications

ExaPanel, with two pack Fluoropolymer Paint System, is a high quality long lasting wall panel used in a variety of cladding applications. It can be used as an External or Internal cladding and is suitable for:

- Commercial facades
- Schools
- Hospitals
- Train stations
- Residential and multi residential
- Tunnel lining
- Acoustic walls
- Balustrades
- Ceilings and soffits

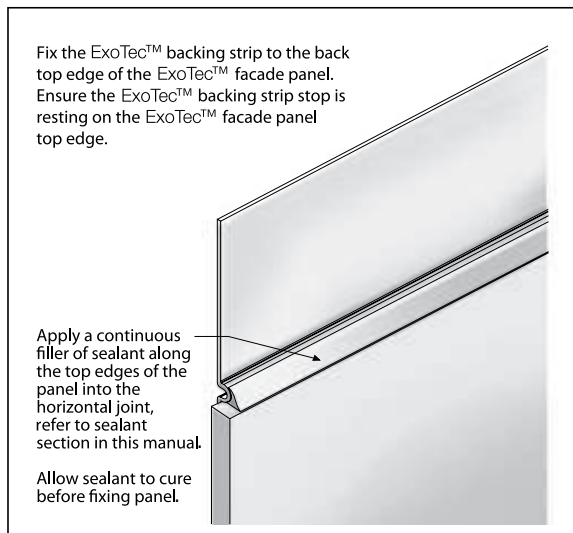

ExaPanel, with two pack Fluoropolymer protective coating systems, are engineered to provide excellent colour and gloss retention along with long term UV resistance and mould protection.
